Universe Isn't Pointless, Says Physicist Dr. Jean Burns

In-depth interview with physicist and researcher Dr. Jean Burns explores her research into psi phenomena and the path forward for consciousness research.

Del Mar, CA, April 3, 2007 – Join host Alex Tsakiris when he interviews physicist Dr. Jean Burns about her experiences on the front lines of the “psi wars”.

During the 50-minute interview Burns discusses the relationship between physics and consciousness research: “... physics says, and remember currently known physics is about matter, it’s not about consciousness ... the whole universe is pointless ... but that’s not all there is, because if you add consciousness, and you add free will, then there’s something more.”

She also explains how religion thought is becoming more in-tune with science: “Religion has a certain amount of doctrines, and if you go to the people who are connected to the theological aspect of any religion there’s a concern – are we compatible with what science is saying? Because if we’re not, people are not going to accept it.”

The interview is available for immediate free download at: www.skeptiko.com/index.php?id=16

Dr. Burns is the author of many scholarly papers and is co-editor of, *Psi Wars* (2003).

About Skeptiko

Skeptiko is the first scientifically oriented Podcast exploring new research in controversial areas of science such as telepathy, psi, parapsychology, near-death-experience, reincarnation, and after-life encounters. Each episode features open, honest debate on new scientific discoveries. The show includes interviews with top research scientists and their critics.
